MedLock
Compliant Packaging Solutions

About MedLock Products

PET Plastic Products MedLock's medical-grade PET plastic bottles, jars, and tubes as well as our glass bottles are safe and secure packaging solutions for a variety of cannabis products. All PET products are eligible for direct printing. See following page for details.

All PET plastic products are shatterproof, leakproof, and odor proof. Caps and closures are child resistant tested and certified. These closures are airtight to maintain product integrity. All PET plastic products are compliant with Access to Cannabis for Medical Purposes Regulations (ACMPR). We provide you with all regulatory and compliance documentation for your peace-of-mind.

All MedLock products can be customized to meet your brand and product needs.

We focus on providing creative compliant packaging that is independently tested for your peace of mind.

Sustainable Packaging MedLock is committed to making a concerted effort to reduce our own carbon footprint by constantly evolving and changing to find eco-friendly solutions for your cannabis needs. Our pop-top tubes and jars made entirely from single-sourced polypropylene plastic that are 100% recyclable.

Our pop-top packaging can now be ordered in a biodegradable polypropylene format. We use an FDA compliant additive, EcoPure®, which rapidly increases the time it takes for these packaging products to degrade in a landfill. These tubes are ASTM D5511 certified. Visit our website or contact us for more information.

One-Step Click-Lock Closures MedLock offers unique one-step, click-lock closures for our jars and bottles. These caps have a child resistant closure with a built-in tamper evident band that breaks upon first open. These two-in-one closures eliminate the need for a separate tamper evident seal or band.

MedLock™ Products at a Glance

 SUSTAINABLE PACKAGING

Direct Printing

MedLock offers direct printing on all PET products.

Ditch the labels and have your graphics and text printed directly onto the packaging.

Submit Custom Order in 3 Simple Steps

1

Select Packaging

- Any qualifying PET packaging product

2

Choose Color

- **In-Stock:** black or white
 - MOQ = 30,000
- **Custom:** any colour
 - MOQ = 50,000

3

Submit Artwork

- 1-2 colours
- Additional fees for graphics with 3+ colours

Less time. Less money.
Less waiting.

All PET Packaging:

- **Flower Jars**
 - 20DR
 - 40DR
 - 60DR
- **Tincture Bottles**
 - 30ml
 - 40ml
 - 60ml
- **Packer Bottles**
 - 75cc
 - 150cc (special order)
- **Tubes**
 - 3.5" (30ml)

PET Plastic Jars

Child Resistant and Tamper Evident

ClickDose™ Oral Syringe

Oral Dispensing Device

0.3ml | 0.5ml | 1.0ml

- Extracts
- Oils
- Tinctures
- Liquids

ClickDose™ Oral Syringes were designed for THC dosage compliance. This product is ideal for accurate, consistent dosage dispensing of extracts, oils, tinctures, and other liquids. When withdrawing product with ClickDose™, the syringe stops with a click at every 0.1ml interval. Ideal for micro-dosing.

- Syringes come individually wrapped.
- Graduated markings.
- 1ml syringe stops with click at each 0.1ml interval.
- Available in 0.3ml, 0.5ml, and 1ml.
- Readily available in white.
- Custom colours available upon request.
- Works best with MedLock PET plastic bottles with 18-415 CR/TE cap with rubber PIBA stopper.

****Bottles and 18-415 CR/TE caps sold separately****

Recyclable & Biodegradable CR Pop-Top Packaging

ASTM D5511 is a standard test method used to determine the biodegradability of plastic materials in a high-solids anaerobic environment.

Child resistant certified - US CPSC 16 CFR 1700.20

FEATURES

ASTM D5511 certified

Recyclable AND biodegradable

Non-toxic: certified FDA-compliant for toxicity; food contact safe

Does NOT produce microplastics or toxic residue

Does not change physical appearance, colour, or feel of product

Made from Organic Compounds

Does not contain:

- Heavy or light metals or metal ions
- Cancer-causing additives
- Enzymes or other microbes

- Does not affect the recyclability of a product; Pop-tops are recyclable AND biodegradable
- No limit on shelf life

EcoPure® is a non-toxic plastic additive that accelerates the rate at which plastic biodegrades in a microbe-rich environment under anaerobic (i.e., oxygen-free) conditions, such as a landfill.

Biodegradable Pouches

Child Resistant. Tamper Evident. Resealable

- Dried Flower
- Pre-Rolls
- Vape Cartridges
- Vape Pens
- Edibles
- Capsules
- Seeds

- Made from polylactic acid (PLA) PLA is a biomaterial synthesized from naturally occurring, renewable compounds, like corn starch or sugar cane.
- **100% biodegradable** "Press to pull" open format.
- Tamper evident tear notch for added safety.
- Child resistant tested and certified.
- Resealable closure to preserve products.
- Highly versatile.
- Custom colours and sizes available upon request.
- Available with or without gusset.

NOTE:

This product has been tested and certified in compliance with the DIN EN13432 and ASTM D6400 standards for assessing the biodegradability of a product.

Recyclable Pouches

Child Resistant. Tamper Evident. Resealable

- Dried Flower
- Pre-Rolls
- Vape Cartridges
- Vape Pens
- Edibles
